## **DETAILED ACTION**

### ***Housekeeping***

Applicant(s) is(are) suggested to list a current telephone number, a facsimile number and a list of the attachments, if any, under the signature of the attorney/applicant for each response to the Office action(s) in order to expedite and make accurate the prosecution of the application.

1. The submission of the Information Disclosure Statement dated December 18, 2002 has been received and fully considered. No further Information Disclosure Statement is in the records.

### ***Drawings***

2. The submission of the formal drawings is approved.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Horie (US 5,558,060).

Art Unit: 3754

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-15 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horie (US 5,558,060) in view of Vattaneo (US 5,839,400)\*. Horie discloses two independently operated intake valves to create a turbulence flow in the cylinder. However, Horie does not show the use of a means for controlling the operation of the intake valve by the load and the speed of an engine. Vattaneo shows that a means for controlling the intake valves independently based upon the load and the speed of the engine is old and well known in the art. Since the prior art references are from the field of endeavor, the purpose disclosed by Vattaneo would have been recognized in the pertinent art of Horie. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Horie with a means for controlling as taught by Vattaneo. Regarding the claimed the preparation of the look up table, it would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic fluid mechanic and normally has the laboratory test facilities. To optimize or select the suitable look up table would be within the ability of ordinary skilled in this art.
